PROFILE

Creative technologist and AI product builder working at the intersection of generative AI, frontend development, UX/UI, automation and visual storytelling. I build working MVPs with AI-assisted development: from idea and workflow logic to data model, interface, integrations, tests and presentation. 15+ years of business-process experience in finance, accounting and construction operations gives me a practical systems view of products and automation.

CORE COMPETENCIES

AI-assisted development / vibe coding: Claude Code, Cursor-style workflows, Git/GitHub, fast prototyping, debugging and product iteration | Frontend/product: HTML/CSS/SCSS, JavaScript, TypeScript, React, Next.js, Figma, UX/UI | Backend/automation: Node.js, Express, Prisma, PostgreSQL, Supabase, REST APIs, Telegram APIs, Railway, Google Drive/Sheets, Meta API | Creative AI: Higgsfield, Midjourney, Kling, Seedance, Runway, Veo, CapCut, ElevenLabs | Testing/workflow: Zod, unit/integration tests, Playwright, idempotent jobs, queues and ledgers

SELECTED CREATIVE TECHNOLOGY & PRODUCT PROJECTS

Card Studio — Wildberries card preparation service · live since October 2026 | Next.js 16 / TypeScript / SQLite / WB Content API / YandexGPT / Claude | [Case](#) / [Live](#)

- Designed and launched the service: Excel/CSV import and loading of existing cards from the seller account, characteristics from WB reference lists, fact-based AI texts, marketplace-rule checks and client approval by link.
- Implemented card creation and updates through the WB Content API that keep sizes, barcodes and photos, a job queue, a free card review by WB link built on public storefront data, and card counting for invoicing; core logic is covered by automated tests.

Sofidar Studio - AI Video Production Platform · in development | Next.js 16 / React 19 / Prisma / PostgreSQL / NextAuth / BytePlus ModelArk / Claude / S3-R2

- Building a private AI-production platform that turns a brief or trend reference into a storyboard, scenes and render jobs; integrates Seedance video and Seedream image generation through BytePlus ModelArk.
- Implemented credit ledger logic, idempotent billing/refunds, job queue, worker polling, local/S3 storage, Google auth and roles, avatar reference-image sets, trend library/import, and mock storyboard mode for development without paid LLM keys.

Construction CRM - Operations & Finance Product | Next.js 16 / React 19 / Prisma 7 / PostgreSQL / Zod | [Case](#)

- Models the real chain Counterparty -> Object -> Contract -> Payment, keeping project budget, contract value and actual payments separate for accurate operational and financial tracking.
- Uses shared Zod validation, server actions, REST APIs for integrations, safe migrations, idempotent seed data and separate unit/integration test layers. Private product in development.

AI Social Publishing Manager - GPT-connected publishing system | Node.js / Express / Railway / Google Drive / Sheets / Meta API | [Case](#)

- Built a GPT-connected workflow for content queueing, scheduling and controlled social publishing with APPROVED/PENDING states, scheduled_at support and preflight media checks.
- Implemented signed media URLs, Meta/Instagram publishing, persistent publication ledger and duplicate protection; a verified end-to-end test ran from chat command to published post in 70 seconds.

Dost AI Company Website - Interactive 3D Experience | Three.js / WebGL / GLSL / HTML / CSS / JS | Live / GitHub

- Built a browser-rendered 3D hero with 136 metallic cubes, real-time reflections, interactive service objects and shader-based volumetric energy; optimized rendering when the scene is off-screen.
- Implemented four-language content and voice tracks, hover/click interaction and a maintainable no-build architecture.

Obmer - LiDAR Room Measurement for Interior Designers | Swift / SwiftUI / ARKit / RoomPlan · in development | Case / GitHub

- Building an iOS/iPadOS product that combines RoomPlan with raw LiDAR mesh and direct depth-map measurement to capture walls, openings, ceiling drops and details that automatic reconstruction can miss.
- Adds scan-quality checks, manual two-point measurement, top-up scanning and export to USDZ, JSON and OBJ. Stage 1 is actively in development.

Oberezhno - Telegram Content Product | Node.js / Supabase / node-cron / Telegram API / Render | Case / GitHub

- Built scheduled morning/day/evening messaging, subscriber management, source tracking, guest-author flows, interactive questions and contextual evening follow-up.
- Implemented automated tests, cleanup of blocked/unsubscribed users and Render deployment workflow.

AI CREATIVE & VIDEO WORK

AI Creative Producer / Creative Technologist | Sofiere Studio | 2026 - present

- Develop concepts, scripts, storyboards and AI-generated video from idea through generation, editing, sound and final delivery; focus on fashion/luxury, premium product storytelling and photorealism.
- Selected work: “Where Attention Goes, Energy Follows” (1:51 narrative AI short), “Fabric & Dunes” fashion film, and “From Sketch to Scale” brand concept.

ADDITIONAL DEVELOPMENT WORK

Kanban Board | React / React Router / Hooks / localStorage | Live / GitHub

- Task workflow across Backlog, Ready, In Progress and Finished with routed task details and persistent state.

Bookshop | Pug / SCSS / JavaScript / Webpack / API | Live / GitHub

- Responsive book catalog with category switching, banners, book cards and JSON API integration.

Also: Al-Bayan Quran PWA, DI Translator AI Bot, YOUTalk responsive layout and commercial WordPress work.

BUSINESS & OPERATIONS BACKGROUND

- Accountant / Business Operations | Southern Construction Company | 2017 - present: full-cycle accounting and construction-process experience; domain knowledge directly informed the Stroyka CRM data model and workflow.
- Remote Accounting / Finance Operations | Arkad Management DMCC, Dubai | 2025: P&L, VAT and corporate-tax workflows in Zoho Books; remote international business experience.

TRAINING & EDUCATION

Hugency Academy AI Artist, CalArts/Coursera UI Design, Skillfactory Frontend Developer, freeCodeCamp Responsive Web Design, Hugo AI-video mentorship. Education: Degree in Economics, Finance & Credit. Languages: Russian native, English intermediate, Turkish A1.
